

# Make Pollution History

## Strengthen TCEQ for a Healthy Texas!

*Dear Texas Lawmaker,*

Protecting the environment and health of Texans is one of the most important challenges facing our state. We know that our future depends on safeguarding our most precious natural resources--the land we live on, the air we breathe, the water we drink.

Texans expect the agency that regulates their air, water and waste to protect them from potentially harmful pollution and to advocate on behalf of our health. That's the job we expect the Texas Commission on Environmental Quality (TCEQ) to perform. And, sadly, TCEQ continues to let Texans down by issuing permits that imperil our health and not enforcing environmental laws.

The Texas Legislature has the opportunity to make significant and lasting changes to the TCEQ through the Sunset review process. We look forward to a TCEQ that does the job we expect it to do.

Texans want to take care of our environment--and we can't do it without you. Thanks for making a stronger TCEQ a priority this year, and thanks for all you do for Texas!
